Summary

Experienced administrative professional transitioning into a career in web development. Two years in administrative roles have helped me build essential skills in teamwork, communication and time management. I recently completed a comprehensive 3-month course in frontend development and am currently enrolled in a 12-week web development program. I am passionate about leveraging my acquired skills to excel in creating dynamic web experiences. Seeking to apply administrative experience and newfound technical expertise to thrive in a web developer role. I offer a blend of interpersonal skills, adaptability, and technical proficiency. My diverse background will equip me to approach projects with creativity, efficiency, and a keen attention to detail.
